Education

Memorial University of Newfoundland
Bachelor of Science - Computer Science

St. John's, NL, Canada
2017 – present

Experience

C-Core

Jan 2022 – present

Part-time Contractor

- Working on interesting geospatial related data-intensive web applications, while continuing degree.

CoLab Software

May 2020 – Dec 2021

Full-Stack Software Developer

- Building the core product of CoLab Software, a 'GitHub for engineers'.
- Diving into both the React frontend, and Python backend.
- Decision maker on some large choices with regards to packages added to the codebase, and advocate for proper review process.

Retrevium

2019 – present

Software Developer

- Architecting & developing a database for storing large amounts of indexable chemistry data, with a frontend as an interface to this.
- Mentoring new developers on the project.

Too Big To Ignore

Dec 2018

Software Developer

- Inherited a project with various long-standing issues, and along with a group of friends, fixed every issue assigned to us, implementing every feature as well.
- Used GitHub Issues and PR process to extensively keep track of the status of tasks in progress.

Bluedrop ISM

Jun 2018 – Dec 2019

Junior Developer

- Working on different aspects of the Bluedrop ISM platform, a SaaS-based training management platform.
- Plenty of experience writing single page web applications using the latest JavaScript tools and frameworks.
- Extensive unit and integration testing of both frontend and backend code.

MUN Computer Science Society

Oct 2017 – present

Executive

Projects

Personal Website

2014 – present

- Long-standing portfolio website, containing a summary of my professional career, where I exist online, and more projects I've worked on.

yaMUN

Jan 2021 – Apr 2021

- Built an alternative interface to MUN's course offerings website using a much more modern design and tech stack.
- Final group project for a Web Development course made in collaboration with two other students.
